OBITUARY

JOHN KLEIN

The death occurred on Sunday morning of John Klein, in his 81st year. Deceased had not been feeling well for some days but became worse on Saturday evening and on Sunday morning was brought to town for medical assistance, dying in the doctor's office from heart failure.

He was born at Bronnithal, Russia in 1851, where in 1900 he married Susanna Margaret Weber, who survives him. In 1907, the young couple moved to Otis, Kansas, remaining there until 1916, where they moved to Alberta, purchasing a half section 7 miles east of Champion. During following years he increased his land holdings to 10 quarter sections, and improved his original extensively, erecting good buildings, assisted by trees, which included many fruit trees, making it an attractive landmark. A good farmer and a good citizen, the deceased leaves behind him a record of industry and a determined effort to succeed which won him the respect of everyone, and his sudden demise is a matter of general regret.

In addition to his widow he leaves two sons, William and Sam, both living here; five daughters, Mrs. John Hansen, Mrs. Alex Kaiser, Rachel, Theresa and Leah at home. One brother, Jacob Klein, residing here, a sister in Portland, Oregon, and two brothers in Russia, seven grandchildren complete the immediate members of his family.

The funeral took place on Wednesday, service being held in the Community Hall, Rev. E. Anshen Moravian minister of Calgary conducting the service, assisted by Rev. Peter Dawson of Champion. United church, interment taking place in the Champion cemetery. A large number turned out to do the last honors and the profusion of flowers added mute testimony to the esteem in which the deceased was held.

During the past season grasshopper outbreaks took place in various localities of Southern Alberta. A control program was followed by the Alberta Department of Agriculture, supplies of poison bait ingredients being shipped to the centres affected. Shipments during the height of the season totalled approximately 81 drums of molasses, 180 tons of bran or oat hulls, 5 carloads of sawdust, 8 tons of salt, and 16 tons of white arsenic. Bait was distributed from Carmangay, Bindloss, Taber, Whittle, Travers, Whittle, Coalville, Milk River, Foremost, Iron Springs, Chisleholm, Queenstown and Hilda.

Department of Agriculture officials are advising farmers to prepare for a more serious general outbreak affecting practically the whole of Southern Alberta next season, unless weather conditions during the next eight months are such as will destroy egg deposits.

Carried elsewhere in this issue is an advertisement briefly outlining certain measures which will reduce if not entirely prevent the outbreak in some sections. A survey of the affected areas is being made by field men of the Field Crops Branch.

Farmers desirous of securing more detailed information on grasshoppers and their control are advised to write Mr. E. L. Gay, Field Crops Commissioner, Edmonton, Alberta.

Consolidated Schools Annual Field Meet

The stage is all set for the Second Annual Field meet which is to be held at the grounds of the Champion Cons. School, on Saturday Oct. 3, under the auspices of the Champion School Board. The program for this year has been altered and improved so that each class has five events for both boys and girls. Three cups are up for competition. The large cup, now held by Mr. Baker's room, will again be presented to the room winning the greatest number of points in the meet. Two individual cups, donated by Mr. McCullough and Mr. Latif, will be awarded to the boy and girl winning the greatest number of points in the meet. These cups will be competed for in the meet. Two individual cups, donated by Mr. McCullough and Mr. Latif, will be awarded to the boy and girl winning the greatest number of points in the meet. These cups will be competed for in the meet. Two individual cups, donated by Mr. McCullough and Mr. Latif, will be awarded to the boy and girl winning the greatest number of points in the meet. These cups will be competed for in the meet.

Many Australian farmers are preparing to take part in the World's Grain Exhibition and Conference to be held at Regina, Canada, next year. They are receiving considerable encouragement from the various agricultural organizations of the country. The special committee of the Western Australian Royal Agricultural Society appointed to interest Australian farmers in this Canadian undertaking has announced its intention to give a special prize at next year's Perth Royal Show for wheat that are grown for the purpose of competing at Regina in 1932. In this way opportunity will be given to Australian farmers to test their products for quality. The Royal Agricultural Society of New South Wales is also taking steps of a similar character.

NOTES AND COMMENT

The weather man seems to have reached the conclusion that harvesting is completed, or should have been completed before the first change of weather occurred. At any rate there has been little chance to finish operations since the first rain. It is a pity we could not have had at least one of these blue rains in July.

The wheat situation seems to be an unsolvable puzzle. So contradictory are the reports furnished from different sources in European countries that it is impossible for the layman at least, to reach any conclusion about any phase of it. Our own grain reports afford the same contradictory features. The total yield of wheat is moved around from time to time until threshing returns are available to permit of a closer estimate. So many people of so many different temperaments enter into these calculations that it is little wonder they are confusing.

This year we have been treated to a normal equinoctial gale, both Sunday and Monday providing high winds and rain. The season at large has provided almost more than the usual weather eccentricities and to have a storm on scheduled time is remarkable. Just why the equinox should be expected to provide stormy weather might be explained by a meteorologist, but the layman must be satisfied with the fact that it often occurs.

The United Farmers of Saskatchewan have laid out a big program for themselves. Direct political action will be used with its objective a change in the economic system which will take the place of the present capitalistic system. It is a matter of regret that an outline of the changes to be made is not available. This is another instance of the blind leading the blind, so far as outsiders are concerned.

Department of Agriculture people anticipate further trouble from grasshoppers next year, following the damage done at many points this year, and means of lessening their ravages are set forth in an advertisement appearing elsewhere in this issue. From previous experience here the advice with regard to burning roadsides, headlands, etc., as soon as the grasshoppers begin to make their appearance in the spring will be recognized as being especially good, as from these some former plagues of grasshopper made their appearance.

Many automotive papers, both in this country and the United States, are recommending the making of slow driving an offense under the law where conditions make it dangerous. So far as some of the provinces of Canada are concerned the police already take action in

aggravating cases, basing their activity on legislation now existing. There was a recent case at Mimico, Ontario, where a driver was fined for proceeding at 17 miles an hour, and the magistrate remarked: You are causing unnecessary trouble for everybody else when you drive at that rate." Evidently the slow pokes are in danger—Motordom.

War threatens between China and Japan. It would appear that internal strife would have weakened China to an extent where her powers of resistance would be very slight, indeed. It is to be hoped the minor clashes that have already happened will be the end of the trouble.

It would appear that the British parliament may adopt some measure of protection in the near future. With the whole world gone mad in respect to the imposition of tariffs no blame could attach itself for a part of self protection on the tariff of the one nation which has managed for so many years to avoid it.

from each of the three loading spouts. The Farnworth sailed two days later, carrying a full cargo of some 270,000 bushels of No. 2 Northern, while the Warkworth, the second of the two test boats, loaded later in the week, sailed with 237,000 bushels of No. 1 Northern, 22,000 bushels of No. 1 hard and the remainder of No. 2 Northern. Accompanying Dr. Manion to see the first test shipment loaded, were Hon. Robt. Weir, minister of agriculture, Hon. T. G. Murphy, minister of the interior. Other members of the inspection group were Capt. R. V. Bennett, brother of the premier, A. W. Merriam, the premier's secretary, Hon. Robt. Rogers, M.P. for Winnipeg South, B. M. Stitt, M.P. for Nelson, John L. McFarland, head of the Canadian wheat export pool, and H. A. Dixon, chief engineer, western region, Canadian National Railways.

In a small village in Ireland, the mother of a village soldier met the village priest, who asked her if she had bad news. "Sure, I have," she said. "Pat has been killed."

pleat. "Did you receive word from the war office?"

"No," she said, "I received word from himself."

The priest looked perplexed, and said, "But how is that?"

"Sure," she said, "Here is the letter: read it yourself."

The letter said: "Dear mother, I am now in the Holy Land."

He covered the ground, on warnings he frowned.

And took many chances slim.

Until at last he was speeding so fast That now the ground covers him.

Wheat is Shipped By H. B. Route

Prairie grain, destined for the inaugural shipment overseas by the Hudson Bay route, was hurried from the 2,500,000 bushel elevator at Churchill, Sept. 15th, into the hold of the steamer Farnworth. The Hon. R. J. Manion, minister of railways and canals, watched as grain cars were emptied of their contents in less than eight minutes each, and wheat cascaded at the rate of 250 bushels a minute into the ship's hold.

YOUR AMMUNITION

In the 438 Alberta Pool Elevators grain growers have the most effective fighting unit in the province.

There is no more unanswerable way of proclaiming to all Canada the western farmers' determination to stand together and fight their way out of their present difficulties than by the delivery of bushels, wagon loads and carloads of grain to Alberta Pool Elevators.

Success depends on deliveries of grain, above all else.

Grain is your only ammunition.

"No argument about this"

1931 Promises
to be one of the
most difficult
years in ordin-
ary experience.

Bad as the situation is, however, it can be aggravated considerably by a failure to meet such portion of obligations as is possible. Undoubtedly, there are numbers of people who have not realized sufficient from the year's crop to live and put in another crop. These will be unable to meet their liabilities. The necessity of an extra effort on the part of those more fortunately situated to pay is so apparent that no further comment is necessary.

The Moral is
Pay

If You Can

Every Little Will Help

EVERY FARMER in Western Canada is now free to sell his grain on the open market. Thousands of former customers again look to United Grain Growers to handle their grain.

UNITED GRAIN GROWERS seeks the business of farmers on its long record of satisfactory service, on its financial strength, on its twenty-five years of successful experience in selling farmers' grain on the open market. The open market experience of this farmers' company, taking volume and length of service together, is quite unmatched in Western Canada.

Assure yourself of safety and good service by delivering your grain to a U.G.G. elevator or consigning it to United Grain Growers Limited.

Richness Of Mineral Fields In Great Bear Lake Area Are Stated To Exceed Cobalt

Confirmation of the sensational richness of the mineral lands at Great Bear Lake was given by Robert J. Jowsey, prominent Toronto mining man and president of the Sherritt-Gordon Corporation, who recently returned by aeroplane from the north.

Although reticent, Mr. Jowsey admitted that he had "never before seen such an abundance of mineral stains in one area in a lifetime of mining."

Mr. Jowsey, who was one of the pioneers in Cobalt, declared that owing to the entire country being composed of high ridges in which the mineral lies, mining will be comparatively simple.

"Where it cost \$80,000 to get a plant going in the Cobalt one with four times the capacity can be set up on Great Bear Lake for \$8,000 to \$10,000."

Discussing the question of production and smelting, Mr. Jowsey expressed the view that there would be no difficulty in smelting the silver ore when it is mined. The proximity of oil at Fort Norman will greatly assist the Great Bear development, Mr. Jowsey believes.

"In all my experience in mining and I've had plenty years of it, never have I seen anything so simple and so great," said Mr. Jowsey. "The copper vein is, I think, the largest and richest in the world. Some of the silver lodes are so rich and virgin that they can be shipped to the smelter and melted to bar silver without any refining," said Mr. Jowsey.

In the present instance Mr. Jowsey is not acting for the Sherritt-Gordon, but went into Great Bear independently.

He proposes to do development work this winter and will send in gangs of men to Great Bear to stake the seven claims he staked on this trip.

"I should estimate," he said, "that there are close to 2,100 claims staked already and every day sees 'planes loaded with prospectors arriving to stake. I hope that I, three my stakes into a couple of million dollars worth of silver, but I can't tell yet," was his smiling statement. He did, however, say that Ventures Dominion Explorers, Sherritt-Gordon, Manitoba Basin, N.A.M.E. and Consolidated Smelters and Miners had sunk a few holes and on the strength of the findings were each leaving men on the claims for development during the winter.

Questioned on the radium situation, he said: "I saw a lot of stuff which they said was radium, but I don't know. I saw a million a ton or \$3 a ton. I couldn't tell. I don't know radium."

"But I do know copper and silver and what I saw showed me that at Great Bear is the largest and richest run of pay-ore veins in the world. Even if the radium only pans out to a dollar a ton, millions will be made from the copper and silver. So abundant is it that it sticks out of the rocks on the lake shore and extends back into the coppermine area."

According to information there are only three mining camps established so far. LaBine has one at Hunter and Echo Bay each, while the Dominion Explorers have one at Glacier Bay.

"Right now," he said, "only the large eastern mining concerns realize the untold wealth of the area. The general public does not seem to know just how heavily the land is mineralized. It will be a repetition of the affair at Cobalt in 1904 when leaders there were sold for a song to the mining corporations. Great Bear will make the Cobalt field look like a piker."

Treatment Was a Success

"Do you guarantee results in your nerve treatment?" asked the enquirer.

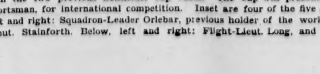

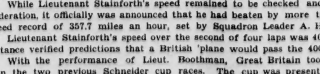

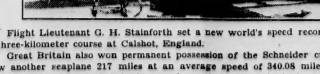

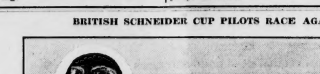

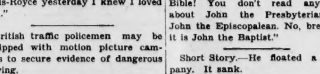

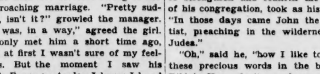

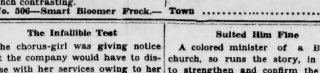

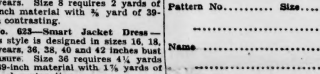

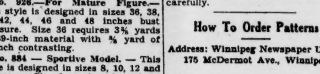

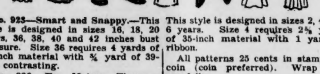

Specialist: "I do. Why, a man came to me for nerve treatment, and when I had finished with him he tried to borrow fifty pounds."

A New Jersey man boasts of having carried the same umbrella for fifty-two years. However, the man who owns it may catch him yet.

"If you go into the cage again and make the lion wild, I will set the dog on you," Musketeer, Vienna.

W. N. U. 1908

FASHION

National Wealth Of Canada According To Latest Estimates Is Placed At High Figure

Just Like Human Beings

Among Millions Of Hens No Two Alike Says Expert Poultryman

To most persons a chicken is just a chicken minus any characteristics which distinguish it from any other chicken, aside from the obvious differences in breeds. But to E. C. Foreman, of Lowell, Michigan, each chicken is an individual. In fact, he says a hen has a social consciousness, a comic urge, and can be just as temperamental as the female of the human species.

For six years he was in charge of the poultry department of Michigan State College and then served as head of the poultry department for two years. Six years ago he came to Lowell and started a poultry farm.

"Every hen," according to Mr. Foreman, "has just as many characteristics as a human being. Among all the millions of hens in the world no two are alike."

"Chickens," he continues, "fall into three classifications. Out of every hundred approximately 10 are super, 60 are mediocre and 30 are culls. That, I think, is about the same percentage as among human beings. The 10 per cent. has beauty and character and intelligence. It is keen and alert and aggressive."

Manitoba Community Farm

Plans For Providing Employment For 1,000 Persons Are Under way

Plans for a community farm employing eventually 1,000 persons were advanced in Winnipeg when it was announced that a five-year lease of the 2,000-acre Manitoba Government Farm, 76 miles northeast of Winnipeg, would likely be granted.

The Imperial Immigration League of Manitoba, negotiating with the Provincial Government for the lease, purposes to convert the farm into a self-sustaining community where married men and their families will have the opportunity of making a living. Fifty families, preferably from Winnipeg, will be given immediate employment. The scheme is designed to relieve unemployment and the city council will be requested to co-operate by allowing \$500 to each man.

Forecast Great Speed

Prediction that speed boats might attain a speed of 1,000 miles an hour in 25 years was made by Kaye Don, holder of the present world's record of 110 miles an hour, speaking at the Empire Club luncheon in Toronto. If progress in development of racing boats continued at the same rate as during the past quarter century, he thought this might be possible.

Young Lady—"I see you advertise Furs against."

Shoptan—"Yes, miss, that is so."

Young Lady—"Very good. I'll send round my squirrel suit and have it made into a seahkin."

Just a Migrant

A compositor, out of work, secured a job as a waiter.

One of the first customers whom he served with soup called him back and said:

"Waiter, there's a button in this soup."

"Very sorry, sir," replied the waiter. "Printer's error. Should be mutton."

"How did your article on perpetual motion turn out?" "Oh, it was a great success," said the author. "Every time I sent it out it came back to me."

Aeroplane passenger service will be established in China from Shanghai to the Siberian border, where it will connect with a Soviet service to Europe.

Mechanical food service which was installed by a small restaurant in London has not proved popular.

"What's 15 shillings for that simple meal? Are chickens so scarce?" "No, but customers are."—Humour.

Handing

BRITISH SCHNEIDER CUP PILOTS RACE AGAINST EACH OTHER

Flight Lieutenant G. H. Stainforth set a new world's speed record of 386.1 miles an hour in a seaplane over a three-kilometer course at Calshot, England.

Great Britain also won permanent possession of the Schneider cup when Flight Lieutenant J. N. Boothman flew another seaplane 217 miles at an average speed of 340.08 miles an hour over a 31-mile course.

While Lieutenant Stainforth's feat was checked and verified by the International Aeronautical Federation, it officially was announced that he had beaten by more than 28 miles an hour the previous world's speed record of 357.7 miles an hour, set by Squadron Leader A. H. Orlebar, in 1929.

Lieutenant Stainforth's speed over the second of four laps was 406.26 miles an hour. This new record for the distance verified predictions that a British plane would pass the 400 mark.

With the performance of Lieut. Boothman, Great Britain took the Schneider trophy permanently, having won the two previous Schneider cup races. The cup was presented by the late Jacques Schneider, French sportsman, for international competition. Last year it was won by the five daredevil who participated in the race. Top left and right: Squadron-Leader Orlebar, previous holder of the world's record, 357 miles per hour; and Flight-Lieut. Stainforth. Below, left and right: Flight-Lieut. Long, and Flight-Lieut. Boothman.

Grasshoppers Root Just Like Chickens

Habits Observed By Specialists of Michigan State College

Grasshoppers go to root at night just like chickens, Michigan State College specialists have observed in their study of ways and means of combating this farm pest.

Shortly before sundown each day the hoppers may be seen hopping toward their favourite rooting places. W. C. Cribbs, district extension agent, reports he has reason to believe a grasshopper returns to the same rooting place each night.

He has observed that when they enter a new field and start feeding on alfalfa or some other green crop, they first eat a border around the field. As the vegetation is consumed they work farther into the field, until finally they have destroyed every bit of green stuff—then they move on to greener pastures.

The reason for this method of feeding, Cribbs explained, is so that they may be near their favourite rooting places at night. Rail and stump fences are popular routes. They even cling to wire fences and perch on the fence posts. If a farm building is nearby they may climb the sides with their bodies if the pest are numerous, Cribbs said.

Grasshoppers, like chickens, want a dry place to roost and sleep. Knowing that grass usually is wet in the morning with the dew, the hoppers take to the "tail places" to keep dry.

Lure Of The North

Many Applications For Permission To Locate At Churchill

The lure of the north is strong in the hearts of Canadians. Anyone desiring this should see the correspondence being filed in an official of the Hudson Bay Railway and the Manitoba Government asking permission to go to the new port of Churchill, which has not been opened yet to public. Everyone seems to want to go to the north.

The requests come from commercial interests desiring to be early on the scene, and from the great mass of individuals that wish to go up with the post. Many desire to go in this fall to establish a business and be ready to open their doors in the spring.

Hotel applications by the dozens, clothing stores, dozens of different kinds of stores, all these are clamoring for the provincial government to let them in on the "ground floor" at Churchill.

It is learned officially, however, that Churchill will not be opened to the public until next summer at the earliest, although the laying out of the townsite is completed.

There is a considerable programme of work to be done at Churchill next summer before the port will be completed, although construction work on the elevator is finished.

British traffic policemen may be equipped with motion picture cameras to secure evidence of dangerous driving.

How To Increase Clover Seed Yields

Harvest First Crop When Plants Coming To Blossom

The yield of red clover seed can be increased by cutting the first crop when the plants are coming into bloom, rather than later, according to the Ohio experiment station. Cutting the hay crop early, so as to give the second or shed crop a good chance, is the one important factor in increasing yield which is within the grower's control. Important factors beyond his control are favourable weather and plenty of bumblebees or other pollinating insects. Early cut hay is more difficult to cure and the yield is somewhat less than later cut hay, but the feeding value per ton is greater than that of more mature hay.

Result Of Wheat Test

Shows Protein Content Of Manitoba Crop Higher This Year

Dr. P. J. Birchard of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent. as against a maximum of 14.5 per cent. last year and a minimum of 10.2 per cent. this year as compared with 8.4 per cent. last; the average being 12.25 per cent. against 11.5 per cent. in 1929. The test grains were taken from the same districts as last year.

A man's temper improves the more he doesn't use it.

Lumber seems to pay best when treated as a farm crop.

OPPOSITION TO EARLY ELECTION IN GREAT BRITAIN

London, Eng.—The London Daily Mail said the board of governors of the Bank of England have taken the "unprecedented step" of visiting the House of Commons to inform the Prime Minister that the National Government must remain in power at least two years if a heavy fall in exchange is to be avoided.

The Mail for several days has been conducting an energetic campaign against the Conservative proposals for an early general election. Its story was published under heavy headlines.

The affairs of the nation reached a position of extreme gravity Thursday, September 17, it said. "Information was conveyed to the government from the city (London's financial centre), that a precarious exchange situation exists . . . and it would appear on reports thus conveyed to the government that the recent unrest in the fleet had a profound effect on British credit and that the time has come when all other considerations must be put aside."

The board of governors of the bank, the paper said, asked the government to make a definite announcement that they would be no general election and that the government would remain in power for its full possible term of two years. It said the board gave Premier Ramsay MacDonald "an alarming estimate" of the amount of fall in exchange which would follow any announcement that an election had been decided upon.

The Mail added that the cabinet met until a late hour and that Mr. MacDonald said he would be free to come to a definite decision for or against an election.

Talk of a general election soon has been growing stronger during the past week and there was widespread conviction in the parliament buildings that it would take place the last week in October or early in November, when an appeal to the electors would be made by the National Government, headed by Mr. MacDonald, and not by parties.

It was believed in the circles that Mr. MacDonald would be willing to head such an appeal and it was said that doubts about the wisdom of an early election were held only by the Liberals and were regarded as based upon that party's hostility to a tariff policy.

Cut Land Taxes

Relief For Manitoba Agriculture Is Chief Motive

Winnipeg, Man.—Following almost \$400,000 from the land taxes for provincial revenue, an order-in-council has been signed by Hon. J. D. McCreger, Lieutenant-Governor of Manitoba. The step is intended to relieve municipalities by giving them a larger share in revenues derived from land taxes.

The levies on the municipalities of \$300,000 for operation of the Child Welfare Act and \$200,000 for the Soldiers' Relief Taxation Act are wiped out. Although the land taxes for these purposes are abolished, the government contemplates no curtailment in the services by which they have been collected. These will be financed out of the general revenues of the province.

Announcement of the wiping out of the taxes was first made by Premier John Bracken last week. He then suggested the money needed might be found by economies in administration, from the Natural Resources Reserve Fund, or from taxation elsewhere on those able to bear it.

Relief for agriculture was the chief motive of the change but it is also hoped it will have the effect of permitting lower rents in the city of Winnipeg.

As a measure of economy the government has already reduced the salaries of all provincial officials and civil servants from the premier down.

Coupling Plans For Bonuses

Calgary, Alberta.—Arrangements for the payment of the five-cent Dominion Government bonus on wheat received completely in Alberta. The supplies and other equipment required in distributing the bonus have arrived at the Alberta wheat pool headquarters. They will be sent to pool elevator agents immediately, it was stated.

Manitoba Sugar Beets

Thirty Manitoba growers of sugar beets have 421 acres under cultivation this year, according to the latest report.

W. N. U. 1908

Wheat Quality Is High

Equal If Not Better Than Any Previous Year

Winnipeg, Man.—Trier, milling and baking quality of Canada's new wheat crop is exceptionally high and is equal, if not better, than that of any year tested by the Dominion Grain Research Laboratory it was announced.

The weight per bushel of the samples received to date and which have just been examined under the direction of F. J. Birchard, are about the same as last year, with the yield of four comparing favourably. The protein content is much higher than the previous crop, while the gluten of different grades also is exceptionally good.

The baking quality is excellent, the report says, and the flour absorption is higher and the loaf volume greater.

REDUCTIONS IN NAVAL PAY TO BE RE-EXAMINED

London, Eng.—After sharp exchanges between the House of Commons and the House of Lords during a turbulent session, the House of Commons yesterday passed a bill through the emergency budget proposals to increase the duties on beer and tobacco.

The Government had comfortable majorities on the proposals to increase the beer duties and 74 on the tobacco duties.

All the statements in the House were overshadowed by the statement of Sir Austen Chamberlain, first lord of the admiralty, to the effect the Board of Admiralty had agreed to re-examine the proposed reductions in naval pay and to consider any cases of alleged hardship. In view of this the House adjourned.

Laborites immediately seized on the statement. There was a clamor from the opposition benches for immediate debate. The Government remained adamant. The opposition then took a motion that the House suspend the 11 o'clock closing rule, but the Government had a comfortable majority to defeat it by 280 to 185 votes.

In an upsurge of questions from the opposition and retorts from the Government benches, the Laborites asked if the unemployed whose benefits had been cut, would also be considered. They wanted to know if the soldiers and policemen would likewise be consulted about their reductions. They remarked on the fact that some of the naval rates of pay have been cut by 25 per cent, while the first lord of the admiralty and some other cabinet ministers are taking a 10 per cent cut.

Prime Minister Ramsay MacDonald replied to one of the opposition's many questions with the declaration that it had always been understood the Government departments making cuts in expenditures could adjust the necessities of the budget that could be taken without materially affecting the budget estimates.

When the House returned to the emergency budget, D. G. Logan, Laborite, declared to the amusement of the House there was neither soul nor sympathy in this damnable coalition. He challenged every member of the cabinet from the Prime Minister downwards, to do battle with him in his constituency of Scotland, Liverpool, the seat represented for so long by the late "Tay" P. O'Connor, Irish Nationalist.

Convict Taking Arts Course

University Work Sent To Youthful Long-Term In Portmouth Prison

Kingsport, Ont.—For the first time in the history of Queen's University, a convict in Portmouth penitentiary has made application to enter in arts course and so his studies extra-murally in prison. The applicant is a youthful long-term. In the past five years he has passed all Ontario Government examinations for entrance to high school. The university work will be sent to him by the head of the extra-mural department at Queen's.

Quebec Session

Report States Legislature VIII Be Called For October 20

Montreal, Que.—The Star publishes the following:

"The first session of the newly elected legislature will be called for October 20, the date already fixed for its meeting when the Houses were dissolved in July last. It is stated in Liberal circles here. Many reasons are advanced for this early session, but the chief is the necessity for the Government to take the favor authority made for extraordinary expenditures for unemployment relief.

TWO CANADIAN DELEGATES TALK AT LEAGUE MEET

Geneva, Switzerland.—Committees of the assembly of the League of Nations heard eloquent and important speeches by two Canadian delegates—Hon. Hugh Guthrie, Minister of Justice, and Senator C. P. Beaulieu, of Montreal.

Mr. Guthrie spoke when the first committee of the assembly discussed the subject of bringing the league covenant against war into harmony with the Kellogg peace pact.

The general sentiment of the committee is so far in favour of the acceptance of the proposed amendments in the covenant, which in the opinion of several speakers would tend to facilitate the work of next year's disarmament conference, for they would leave no ambiguity or doubt that war is to be abolished as an instrument of national policy.

Acceptance of the conclusions reached last year in favor of the proposed amendment, was advocated by Mr. Guthrie. He expressed strong opposition to any suggestion the matter should be adjourned.

The danger of adjournment, he pointed out, was that the man in the street would see the nations of the world rushed to renounce war but refused to translate their actions into a formal undertaking.

Senator Beaulieu spoke during committee deliberations on the minorities question. He advocated improvement in the present procedure for the league on the minorities problem, stressing the need for greater publicity concerning the treatment of minorities. Viscount Cecil of Chelwood, the British Government's chief delegate, supported Senator Beaulieu while Foreign Minister Curtius, of Germany, agreed that more publicity was needed.

"Justice may be blind but it need not be concealed," declared Senator Beaulieu. The subject was of the greatest interest both to Canada and her great neighbor to the south. He stressed, for both Canada and the United States had numerous minority populations which remained firmly attached to their countries of origin.

REPRESENTS CANADA

C. A. Bowman, Editor of the Ottawa Citizen, who is one of the Canadian delegates to the fourth meeting of the Institute of Pacific Relations to be held at Hangchow, China, in October.

Further Returns From Recent Census Subject To Correction

Ottawa, Ont.—A further correction of population in a number of cities and towns of Canada will not be dealt with in previous announcements, has been announced by the Dominion Bureau of Statistics. The statement covers more particularly a number of towns, although it deals also with cities in different provinces.

The figures issued show that the city of Quebec, increased from 95,193 in 1921, to 126,103 in the present year. The population of Windsor, Ont., has advanced from 38,501 to 62,057 in the ten-year period.

In western Canada, the city of Regina reported an increase from 34,432 to 53,034.

The largest percentage increase recorded in the statement is in the town of Riverside, Ont., which increased its population from 1,155 to 4,420 in the present year. This is an increase of 283 per cent.

It is made clear in the statement that the census is a preliminary one and that returns are subject to correction as additions on account of closed houses and absentees have yet to be made.

Proportional Vote Opposed

Manitoba Conservatives Object To Proposal Of Attorney-General

Winnipeg, Man.—Opposition to the principle of proportional representation contained in a suggestion by Hon. W. J. Major, Attorney-General, for a reduction in the number of seats in the Manitoba Legislature, was expressed on behalf of the Conservative party by Col. F. G. Taylor, leader of the group.

Col. Taylor said his party has no objection to the proposed reduction but "will use every legislative means to prevent the extension of the suggested proportional representation system to the rural areas of the province."

Mr. Major's suggestion would reduce the number of seats from 55 to 35 and would apply proportional representation to the whole province with the exception of four single-member constituencies.

Superiority Of British Films

Toronto, Ont.—The increasing superiority of British motion pictures has led to the establishment in England of branch United States studios according to R. S. Royce, Canadian representative for British International pictures. "Hollywood is alarmingly taking in the outside world," he commented.

"The Province of British Columbia is suffering particularly because of contraction in the lumbering and mining industries. Field crops in that province, as in the eastern provinces, have been quite satisfactory as to volume, but not so satisfactory as to sales prices obtainable.

"Manitoba has already commenced its highway construction work and a substantial programme of municipal projects will be submitted for approval shortly.

"There are many indications that the nation-wide depression is passing and that Canada may look forward with reasonable assurance that, as in every similar previous experience, she will emerge earlier than some other countries to a new era of progress.

During the past week, however, the transportation situation seems to be improving and it may with reasonable expectation be expected that railway earnings will show better results during the next few weeks than they did in the month of August, owing to the fact that the crop movement is later this year than last year.

Only 20 Italian pictures were produced in Italy in the last year.

Radio Development

Col. Steel Appointed To Staff Of Research Council

Ottawa, Ont.—Lieut-Col. W. A. Steel, M.C., who has directed the radio development of the Department of National Defence, has been appointed to the staff of the National Research Council. It is announced.

Col. Steel has had a distinguished career in both military and radio fields, he has represented Canada at numerous international radio conferences and is accompanied Premier R. B. Bennett to the last Imperial Conference.

Radio research has been assigned a definite place in the plans of the National Research Laboratory, and many problems of a technical nature will be dealt with under the direction of Col. Steel.

International Peace Garden

Tract Of Land At North Dakota and Manitoba Border Is Selected

Ashurst Park, N.D.—A tract of land on Turtle Mountain at the North Dakota-Manitoba border was approved by the National Association of Gardeners in convention at the site for the international peace garden.

Final decision on the adoption of the site will be made next spring at a joint meeting of the International Peace Garden Commission, and executive committees of the Canadian Association of Florists and Gardeners and the National Association of Gardeners.

The site was not placed in the final decision.

MEASURES TAKEN FOR RELIEF WORK ARE OUTLINED

Ottawa, Ont.—A review of Canada's unemployment problem and an outline of the relief measures which are being taken by the Federal Government in co-operation with the provinces and municipalities is outlined in a statement issued by Hon. G. D. Robertson, Minister of Labour.

"Relief of the farmers in the drought stricken areas of the prairie provinces constitutes the most important problem in western Canada, but it ought not to be confused with unemployment arising from industrial and commercial fluctuations.

"Some substantial projects in the urban centres have been tentatively approved, and the Minister of Agriculture (Hon. Robert Weir), is actively directing the farm relief programme in those areas, particularly in Saskatchewan, as well as assisting in this relief of unemployment in the cities and towns.

In western Canada substantial park areas in Alberta offer opportunities for the creation of considerable useful work in delimiting park boundaries and building roads, and opening up avenues of communication between park areas, of which Jasper and Banff are centres, as well as assisting in the construction of a road system in the park areas of British Columbia.

The Provincial Government of Alberta has concluded an agreement with the Federal Government respecting both provincial and municipal undertakings in that province, and the Ontario, it is expected that substantial relief will accrue to the larger urban centres by the withdrawal of truants and single men, who may be wisely assisted in the outside undertakings, both in parks and on provincial roads.

"The Province of British Columbia is suffering particularly because of contraction in the lumbering and mining industries. Field crops in that province, as in the eastern provinces, have been quite satisfactory as to volume, but not so satisfactory as to sales prices obtainable.

"Manitoba has already commenced its highway construction work and a substantial programme of municipal projects will be submitted for approval shortly.

"There are many indications that the nation-wide depression is passing and that Canada may look forward with reasonable assurance that, as in every similar previous experience, she will emerge earlier than some other countries to a new era of progress.

During the past week, however, the transportation situation seems to be improving and it may with reasonable expectation be expected that railway earnings will show better results during the next few weeks than they did in the month of August, owing to the fact that the crop movement is later this year than last year.

Only 20 Italian pictures were produced in Italy in the last year.

SURVEY IS MADE OF THE WEST'S NEW GRAIN PORT

Churchill, Man.—Bull on the barren shore here in Manitoba's north country, Churchill's ultra modern development, was the occasion of an Ottawa delegation headed by Hon. R. J. Manion, Minister of Railways and Canals. Two other cabinet ministers, Hon. Robert Weir, Minister of Agriculture, and Hon. T. G. Murphy, Minister of the Interior, were in the party making a preliminary survey of the new grain port.

Confidence in the ability of Canada's farthest north grain harbour to handle any business which may develop via the bay route was expressed by Mr. Manion. Before leaving for the south he remarked that the mechanical portion of the port, designed and had functioned perfectly on its initial test, leaving scarcely of the route developed only in the future.

"Not a doubt was entertained by the minister but that the 'Farmworth' and 'Warwick' chartered by the Government to carry the inaugural bay route shipment overseas this month would reach their destinations successfully. He even considered that lower bay insurance rates on bulk and cargoes might be expected for the first shipment, as a result of the low rates on the 50,000-bushel ships of Saskatchewan wheat.

Canada's Government, Mr. Manion pointed out, had been the beneficiary of the Imperial shipping committee at London any successful journey overseas through the Hudson Straits. In the endeavour to obtain the most equitable insurance rates possible, he stressed the fact that the government had undertaken to insure that rates on the test shipments from Churchill would not be higher than from the prairies via Montreal. Possibility that the Government might be called to foot a bill for an extra cost by the bay route was indicated by Mr. Manion.

He pointed out that the Government had provided its harbour facilities for the first summer, the harbour will be ready to handle cattle, on the west's agrarian areas, the minister forecasted that the new port would trade might necessitate the provision of cattle yards at The Pas 51 miles southward, but saw no difficulty in the way.

Coal and lumber handling facilities, he said, would be pressed forward to handle the summer cargo, but the entire facilities would certainly be ready by 1933.

"The Government will promise nothing that cannot be fulfilled," said Mr. Manion, "test the failure to implement an undertaking might result to the disadvantage of the port."

"Without John I. McFarland, head of the Canadian Wheat Pool's Central Selling Agency, the trial shipments this fall would have been impossible," commented the minister. No other offer of wheat for the bay route shipment had been made, he said, and even now the second cargo has not yet been sold. Mr. Manion announced that the shipment of No. 2 northern, trimmed down Wednesday, September 16, in the hold of the 'Farmworth,' had been sold by Mr. McFarland to the London, England.

Perfect synchronization of the work at Churchill by the various developing groups was named by the minister as the outstanding reason for the so-theat success of inaugural operations. He commended especially C. P. Ryan, consulting engineer of Fox William, Ont., who designed the 2,500,000-bushel elevator which has taken rank as the world's fastest operating grain elevator.

Four Straight Records

Quebec, Que.—The Canadian Pacific "Empire of Britain" ship, docked at Quebec August 31, made its fourth straight record of the Atlantic journey, from land to land, in 10 days, nine hours and 23 minutes. This is the fastest time in which this stretch of water has been covered.

The steamer carried nearly 1,000 passengers and 21 automobiles.

Operated by one man, an electric shoveller has been developed that will take eight dump-truck loads at a little over nine minutes.

Local and General

J. R. Moore was a visitor in Hillspring last week.

Mrs. F. Gottenburg was a tea hostess on Friday, Sept. 18th.

F. J. Clapp returned from a trip to Calgary on Monday's bus.

Mr. and Mrs. F. Watts were visitors to Strathmore on Sunday.

Mrs. Ernest Rhodes was a week-end visitor to friends in Bellevue.

Don't forget the Sunday school rally on Sunday Sept. 27th at 11 a.m.

Born—On Saturday, September 20th, to Mr. and Mrs. Max Groves, a son.

The C.W.L. are having their annual chicken supper and novelty table on Nov. 7.

The C.W.L. are holding a bake sale in the dining room of the Savoy hotel on Oct. 3rd at 3 o'clock.

Mrs. Hancock, of the Home Bakery, left on Monday for Chicago, where she will spend the winter.

Found—On Fireguard trail west of Fred Alder's, a leather coat. Owner may recover same at the Chronicle Office.

G. M. Campbell was a business visitor to Calgary during the week, returning home Thursday morning.

Jasper Root, who was seriously injured recently in the collapse of a bridge, is progressing slowly towards recovery.

Fred Steeves was operated on early in the week for appendicitis and is reported to be making satisfactory progress.

Found—Near stockyards, A club bag containing suit of clothes, shaving accessories, etc. Owner call at Chronicle Office.

Mrs. Mitchell of Victoria, B. C., was the guest of her sister, Mrs. J. T. Stephenson for a few days, en route from Toronto to her home.

Competitors from nine rural schools as well as from each of the five rooms in Champion school are expected to take part, so everything points to a bigger and better day for the youngsters, on Oct. 3.

The ladies of the O.O.R.P. will hold a Thanksgiving tea and bake sale in the front part of the Champion Groceteria on Saturday afternoon, October 10th. Everything good to eat will be available.

Wanted—Cook stove. Must be small and cheap.—J. Doyle.

Mr. and Mrs. W. A. McIntyre were recent visitors to Bellevue.

Mr. and Mrs. A. McCullough were Calgary visitors this week.

The Japan-China trouble would appear to be in a fair way of settlement in the near future without a general resort to arms.

Joe Mark and Bernard Johnson, two former Champions, now attending Alberta University at Edmonton, were visitors in town this week.

As a result of the suspension of gold payments by Great Britain, the Canadian dollar is quoted at 94 in New York, while sterling is quoted at \$4.11.

The completion of the P.G.E. railroad to Peace River from its present terminal in B. C., is proposed as a partial relief measure. It would afford employment for 8,000 men.

K. R. McLean, R.O., of McLean & Anderson, 812 special, 224-8th Ave West, Calgary will make his monthly visit to Champion, Friday, October 2, at the Drug Store.

Tuesday night's frost was dense in its character, and the brilliant sunshine of the following morning quickly displayed the end of practically all flowers and other tender garden vegetables.

Mrs. Milliken has now taken out a license for her Nursing Home and will devote more attention to the business than in the past, demand for such an institution having risen steadily.

Note advertisement in another column, which, by the way, was accidentally omitted last week.

Mrs. D. D. Farmer was hostess on Wednesday afternoon at a shower in honor of Miss Audrey Lucia, whose wedding to Mr. E. Aultman takes place on Thursday. There was a large number of ladies present and the prospective bride was the recipient of many useful and handsome gifts.

Owing to the late receipt of advertising material and trouble with a damaged press this issue is mailed on Friday morning. Please try and get your change of ads to the office by Wednesday noon, or as soon after as possible.

Circulars from outside points reaching town of late would lead to the impression that groceries had gone up sharply, when compared to prices quoted by Champion merchants. There is every reason to assert that

Champion is one of the best points to buy at in the country or even the cities, when allowance is made for freight.

Have you heard the one about the Scotchman who rented a house close to the church because he was fond of rice pudding.

"Oh, John," sobbed the young wife, "I had baked a lovely cake, and I put it on the back porch for the frosting to cool, and the d-d dog a-sate it!"

"Well, don't cry about it, sweet."

It will pay you to read the Advertisements carefully.

They carry suggestions for thrifty buyers well worth investigation.

heart," he consoled, patting the Pretty, flushed cheek. "I know a man who will give us another dog."

They were arguing as to whether it was correct to say of a hen "she is sitting" or "she is sitting."

"The question," said the farmer, "don't interest me at all. What I want to know when I hear a hen cackle is whether she is laying or lying."

It was not much of a bus and the driver, being dissatisfied, took it back to the garage.

"What is wrong with it?" he was asked.

"Well, you see," said the driver, "every part of it makes a noise but the horn."

Duquesne & Vanbesien

REDUCE THE POSSIBILITY OF A Grasshopper Outbreak 1932

Serious outbreaks of grasshoppers occurred in many localities of Southern Alberta this year. Folsen bait was distributed from twelve centres in this area. Indications point to a general outbreak over all Southern Alberta in 1932.

Take Preventive Measures Now

Certain preventive measures, costing very little, taken during the autumn or spring months, may save thousands of dollars in material and labor next year.

The female grasshopper deposits eggs in clusters in the top inch of the soil surface. Many of these eggs may be destroyed by the following practices:

- (1) Shallow cultivate or shallow disc stubble fields to expose the eggs during winter.
- (2) Spread straw and burn roadside, headlands, fence corners, abandoned fields, or any grassy or weedy plots, about one week after the small grasshoppers can first be found in the spring.
- (3) Fall or spring plow stubble lands to a depth of at least 6 inches, being careful to turn the furrow slice completely over, and, if possible, packing the land following ploughing.
